BEA is a not-for-profit organization setup in 2011, with young people passionately coming back to the state Bihar and working voluntarily to Make an **Enterprising Bihar**. It believes India can't develop if this state with largest youth population of 80 million is left dependent on Government jobs. Hence since 2011, it started working to create Job-Creators from inside the state and bringing people back to the state. It works on three objectives, Inspiration cum Motivation, Preparation and Execution.

We have been working for last six years for bringing Change in a state which was not known much for being Enterprising. We have created around 3000 Entrepreneurs covering 38 districts of the state with more than 93,000 youth interactions and have more than 18000 registered members. It has gathered substantial pool of Seed Fund, Angel Investors & VCs; tie-ups with Organizations like EAI; Academicians and Consultants from organizations like Harvard, Oxford, Virginia, IIMs, IITs, LSE; Bankers; Students (Potential Entrepreneurs) from top institutes etc.

BEA has been partnering with **Govt of China, Govt of Turkey, US Dept of State, Organizations in Israel, UK, Canada, Taiwan and Netherlands** to name a few in the past for Innovation-Industry Tie-up, Trade and Investment and exchange programs.

With initiatives like **district-level and block-level Bihar StartUp Yatra & YUVA Yatra**, we have taken concept of Entrepreneurship to all districts and blocks of the state followed by Incubation support at its Incubation Centre in Patna setup in 2013. BEA started Business Helpline for all kind of information in starting a business. It is on agenda of BEA's Roadmap 2018 for making Bihar the Next Investment Destination in three years. We have been working in developing all Tech and Non-Tech sector especially through AgriTech, HealthTech, CleanTech and EduTech.

It organises workshops and programs starting with coding programs, hackathons to Deep-tech like AI, ML, AR, VR and Data Science.

US Ambassador have visited BEA office and met the team, followed by many other India Ambassador who visited us, guided and motivated us to work at grass-root level. Many a times our work has been appreciated by Government organizations especially by NITI Aayog which selected it as the only organization in the 1st phase from Bihar and Jharkhand to setup Atal Incubation Centre. It has partnered with RBI, SEBI, Ministries of Govt. of India and Govt. of Bihar.

Our Annual event and also a Path-breaking event for Ecosystem Building in Bihar is Bihar

Entrepreneurship Summit (BES). 1st **BES in 2014** paved the way for making Bihar the Next StartUp Destination through **StartUp Yatra** with highlighting Innovation and Incubation; **Hon Chief Minister of Bihar has inaugurated BES-15 and BES-17.**

BES-15 gave Bihar StartUp Policy, Incubation Centres, IT Park at Biscomaun, a 500cr State Venture Capital Fund, Bihar StartUp Yatra in all districts among some initiatives.

BES-16 gave Udyog Samwad (Direct Talk between individuals and Govt.), StartUp Committee to implement StartUp Policy, many tie-ups. **BES-17** saw launching of StartUp Policy with 4000 participants and StartUp Expo. 5th **BES-18** was inaugurated by **His Excellency the Governor of Bihar** and Union Minister of State for Finance and speakers were Padamshree and Ex-Ambassadors with 1200 participants and Tech Expo.

6th BES-19 has been planned with Bihar Pravasi Sammelan with the theme Grassroot to Global with Many Global Speakers, Investors, Entrepreneurs and Senior Representatives from Banks, Govt. etc.

BEA has 12AA and 80G certification which makes it eligible for donations and CSR funding. It has FCRA which enables it to receive foreign contributions.

❧ Abhijeet Narayan ❧

(Green Shelter)

Hailing from the city famous worldwide for Litchis, Muzaffarpur in Bihar, Abhijeet is an MBA with vast experience of sales and marketing in Telecom sector and in paint industry. He is the Founder of Green Shelter. It targets to catch them and train the students so that they may develop a sense of ownership for environment. He is all set to launch specialised gardening kits for kids.

It was his growing concern about the continuously degrading environment that he started Green Shelter back in 2016 with the sole objective of encouraging people and assisting them with plantation providing end-to-end solutions.

He is presently operating from a Patna-based plant nursery. He encourages customers to create their own oxygen zones in their respective houses by placing such air-purifying plants that require less sunlight and are low-maintenance.

Plants are gaining acceptance as gifting items. To cater to the increasing demands, Abhijeet started a mini nursery on a three-wheeler, Plants on Wheel. He is

supplying plants across India via Amazon where he is assisted by his equally motivated better half.

Green Shelter has also been recognised as a Start-up India project by DIPP last year and Abhijeet was awarded the prestigious Young Entrepreneur Award - 2017 by Bihar Entrepreneurs Association. Meanwhile, his product pitching skills won him the top slot in the National Pitch contest organised by Dainik Jagran in Bihar in November 2017.

Abhijeet's majority of time, during his childhood, was spent in Samastipur, Muzaffarpur and Patna as his father was employed with a Nationalised Bank. He had a humble middle class upbringing. Both of his parents were graduates and studies found utmost importance in the family, thus, inculcating similar attitude in him. After completing his Class-XII from Patna, he marched ahead to New Delhi for his graduation and eventually did MBA in Marketing from Centre for Management Development, Modinagar.

Right since his childhood, he was close to nature and used to visit his family farms in Muzaffarpur. In summer holidays, he used to spend most of his time at the farm; plucking fruits from plants was something he cherishes till date.

Having worked for 12 years in Paint and Telecom Industry and during his job assignments, in various training sessions, he was briefed about the health hazards of paint or mobile phone radiations on human beings.

His interest in mitigating the hazardous impacts of pollution found soil in the same period. Media reports and documentaries focussing issues facing the environment and their possible solutions proved crucial. He actually did a thorough research before venturing into the business himself.

When done with the homework, he started in 2016 with a clear approach of doing something for the betterment of environment and the society at large. Here came Green Shelter into picture placing plants within the homes, helping absorb harmful gases and making the indoor air clean and healthy.

www.greenshelter.in; abhijeet@greenshelter.in

❧ **Arjun Singh** ❧
(Arcon Group)

A first generation entrepreneur himself, Arjun Singh, is a charming personality always ready to grab the opportunity. With great enthusiasm and passion driven approach after completing his studies, he embarked on his entrepreneurial journey with trading in iron ore and other allied minerals.

Alike any other Start-Up, he faced many odds only to come with flying colours and incorporated Amit Mines Private Limited in 2008. Today, Amit Mines supplies minerals pan India. First milestone he achieved was the acquisition of Amit Metallic. This was his maiden venture into hardcore manufacturing. He was awarded Young Industrialist Award consecutively in 2008 and 2009. He was also given Personality Award in Dubai in 2016.

He is now venturing into his dream project ARCON which he started back in 2011. ARCON has been working extensively with industry leaders including NTPC and Bridge & Roof Co. India Ltd. Recently, ARCON has ventured out in real estate and is constructing an ultramodern shopping mall and recreation centre in Muzaffarpur district.

Recent projects include construction of a polytechnic college in Canning, West Bengal, construction of residential accommodations in Indore and construction of a hospital building in Varanasi besides a township in Patna christened as Arcon Atmosphere and commercial complexes including DDC, DRB and Shivjanki.

www.arconprojects.org

❧ **Alok Chaudhary** ❧
(Alok Raj Associates)

Hailing from Muzaffarpur, Alok Chaudhary spent his early childhood walking in the lanes of Balughat, Muzaffarpur. He has with vast experience of design and execution and presently heads Alok Raj Associates.

It was his growing concern about the limited choice in interior design that he started his venture with the sole objective of encouraging people and assisting them with superior design and exotic touch.

Once a CA drop-out, he is presently operating from Patna extending services to customers. He holds a Degree and a Diploma, INIFD, Patna Chapter. Although he travels frequently for work; most of them are turnkey projects. His firm encourages designs interiors and executes them. Diversifying the business is what Alok firmly believes in, thereby providing employment to

numerous carpenters, painters, false ceiling & flooring operators and so on.

He is a hardcore believer of necessity-driven invention. What once kicked off in 2002 momentarily for readymade garment brands is a one-stop design solution. Then the market came to standstill with saturation in 2005, Alok started professional designing only after similar contracts seized to flow in. They completed more than 3 lakh square feet carpet area in the last calendar year.

Born sixth among seven kids of the household, he is a commerce graduate from RDS College, Muzaffarpur. His father an IT consultant; mother a homemaker.

www.asterupvc.com

❧ **Bipin Bihari** ❧
(Bhutani Infra)

For someone who started his career decades back as Zoology graduate medical representative, Bipin Bihari has been an actual inspiration. Coming from a humble rural background, as the one who could not pursue his course as a medico due to financial constraints, Bipin has made sure that money is not a constraint when his only son wants to pursue the same course.

He's now an MBA from IMT, Ghaziabad, with many other feathers donning his hat. He spanned his career across industries and he's presently serving Bhutani Infra as Director (Sales) for upcountry markets since 2016. Prior to this, he has led several top-notch banking and real estate giants.

He attributes his professional prowess to the unending support extended to him by his spouse Pratima Kumari, a Psychology post graduate, and their loving son Shaurya.

He has been a resource to his colleagues and friends alike and people who once took orders at a Patna-based restaurant have made fortunes. All thanks to his company. The feat is remarkable! This is when his father then an office superintendent, Late Shashi Bhushan Thakur, took him to school riding his humble bicycle. His mother Sadhana Kumari was a High School teacher. This made education a family priority and it is due to the same value that his sibling, Suman, is now stationed in NCR region as a senior income tax official.

www.bhutanigroup.com

❧ **Dr B Priyam** ❧
(Scholars Abode School)

Dr B Priyam is a prominent figure with qualifications including MSc, PhD and BEd. She is the Founder cum Principal of Scholars Abode School in Patna.

Her interest towards education took her to start a school in Patna which helps grooming the kids with elegance; a genuine teacher with a pleasant personality. This pleasant personality is kept protected by a superb professional. Frequent competitions are conducted by the Scholars Abode to ensure that students understand two basics simultaneously: fierce competitiveness and sportsmanship. That not every day is our day. That team wins, players individually don't.

She keeps advising faculty for the betterment of teachers and students alike. Her contributions to the local students

are appreciated by the parents concerned as the fact the roll sheet is ticking.

Academic milestones have been kept on a priority by her as evident from the degrees she has. Also, she derives pleasure in the quality of her work as accepted by colleagues with a sense of pride in the organising and reorganising an administrative system in a way that actively contributes to the effectiveness of the school policies. Work is particularly prized for her as it makes her raise the standard day in and day out. She has wide range of teaching. That makes her an asset.

Dr B Priyam was the first child to her parents. Her father was so much fond of her that she was brought up as a son. She had developed instinct of being an

administrator since her childhood and that's what she has become in future.

Been gifted with a sharp brain, she achieved her educational goals easily in a simplified way. The one who introduced her to her own potentials and skills was Mr. Ehtaram Yakin, Zoology professor. In her own words, "Ehtaram Yakin was the one who made me realise who I am and what I am capable of."

She won various awards and the list of her achievement is endless including

Icon of Bihar, Pride of Bihar, Naari Samman, Power Women Times, Award from Education Minister- KN Prasad, Bharat Jyoti Award, Rashtriya Shiksha Ratna Award, Best Citizen Award and Award from Secretary, CBSE.

<http://www.scholarsabode.info>

❧ **Chandan Kumar Singh** ❧
(Citizen Care Group)

Coming from a very humble background, Chandan Kumar Singh started his entrepreneurship journey and led the foundation of Citizen Care Group in the year 2015 with the aim to provide different and innovative products and services to the market of Bihar.

Manufacturing of E-Rickshaw, Battery operated rickshaw and Eastman tubular battery are some product & services offered by Citizen Care Group. He launched Biodiesel in Bihar with the objective to make the environment pollution free and also Bihar the biggest consumer of Biodiesel in the country.

He is now working on renewable energy to make Bihar hub of biofuel. He aims at establishing a biodiesel refinery in Bihar which will not only benefit the consumer but also act as great employment generation source for the youth of Bihar.

This will also help the farmers as some of the raw materials would be taken from them. His motive is to

bring in types of useful products in the market of Bihar in a way that the State would be able to compete with other States of India and go on to become a developed one.

The benefits of biodiesel are increased mileage, reduction of pollution, cheaper than the diesel, abundance of availability, manufactured in India only and best substitute of crude oil.

Citizen Care Biofuel Power project Private Limited is getting loads of love and support from Bihar. This product has been accepted widely by the people of Bihar and if this continues soon we will be having a greener Bihar.

He believes that the greatest inspiration one can ever get is to know that you are an inspiration to others. So, wake up and start living an inspirational life.

www.citizencaregroup.com

❧ Gautham Azad ❧

(NummeroBay)

An engineer by training and a numerologist by Passion, Gautham had the fascination for Numbers since his early 20s. What he did to revolutionize his life was change the way he spelt his name. He added an “H” in his name, once the vibrations of his new name started kicked in, Gautham sat back soaked in the success, name and fame; this simple change brought about a drastic transformation in his destiny.

For Gautham, numerology is not just a whim to experiment on other’s lives. It is rather a self-tested medicine that he has studied in depth. His engineering background allows him to practice numerology more as a science than superstition. For him, numerology is a noble profession wherein he brings smile on people’s faces who were earlier in distress.

He is singularly responsible for changing the destinies of many in India and abroad with just a small shift in the way people’s names are spelt or by changing the spellings of their name and wearing favourite colours.

What started out as passion, turned into full-fledged profession back in 2014 when he decided to quit his regular job with a multinational employer starting a full-time numerology consultancy christened as NummeroBay.

It is fascinating to know how he works. All Gautham needs to know is your birth date and the spelling of your name. And, he starts calculating all the numbers and connects it with your favourable and non-favourable planets and then decodes it with number. He won't ask for one's horoscope or the lines of one's palm nor ask to pick up a card in tarot reading. He does all the computing in his mind, coming up with your lucky number, planet and lucky colour. He does all in front of you when you are talking to him.

The limitations of one's date of birth can be overcome by modification of the name by adding or deleting of alphabets to add fortune! Challenging names are much more likely to attract obstacles and difficulties. On the other hand, a fortunate current name (in harmonious vibration with our date of birth numbers) paves a clear

and much easier road towards success, peace of mind and happiness.

Gautham Azad has been invited as a speaker in many corporates, start-ups and other institutions alike and has been instrumental in creating Product Name, LOGO Design and Colour. He believes that usage of Blue colour helps Employees to make fewer mistakes.

Using Numerology, Gautham correctly predicts the social, political and sports outcome too. For instance: He predicted BS Yeddurappa as the 24th Karnataka CM back in 2018. He is the one who predicted Sachin Tendulkar's 100th ton. He predicted for Jharkhand CM Raghuvar Das becoming the sixth CM of Jharkhand to J Jayalalithaa again resurrecting back to power for the fourth time in 2016, when whole media and political pundits predicted no come back for her.

He recently shot to fame for predicting FRANCE as the Soccer World Cup winner in 2018.

www.nummerobay.com

❧ Hansraj ❧

(Techinfy Solutions Pvt Ltd)

Bihar-born technocrat, investor and philanthropist, the one who dares to go in unexplored territories, Hansraj has over two decades experience when it comes to the Indian corporate sector. He is presently CEO, Techinfy Solutions Pvt Ltd., after a sound exposure with top-notch employers including Sony, LG, Nokia and Samsung in multiple profiles.

Just at his professional zenith, he decided to quit corporate sector leaving everybody dumbfounded. “It’s been 21 years in corporate life, my life has changed, now time has come to change my state and give back to the society,” is what he told his family, friends and colleagues alike.

Hansraj was born and brought up in Bhagalpur and soon after completing his education from India and abroad, he served specially in the regions of South East Asia, the US, Europe, Middle East and Africa. After founding Techinfy, as he always desired, he wanted to eliminate the rift

prevalent between healthcare and educational sectors within the state as compared with rest of the country.

After rigorously following up with various educational institutions, he managed to convince the management of Katihar Medical College & Hospital for making it a paperless institution. Within a span of just one year, he delivered making it the first fully digitised Medical College & Hospital in Bihar.

Since then, he never looked back. Working closely with Ministry of Health & Family Welfare, Technify Solutions completed the prestigious Digital Mission Mode Project in which as many as 540 Medical Colleges & Hospitals of the nation were integrated with MoHFM.

In 2018, he took Magadh University's project for digitization of university and the project went live within a year. Students of 170 colleges of Bihar under Magadh University completed their registration process online. It is the first university in the state which has

incorporated such cutting-edge solution.

When sought advice by the younger lot aspiring entrepreneurship, he says "there's a lot of hype about having a flexible lifestyle but the truth in entrepreneurship is that you're going to work really hard; for long hours. So don't choose this way of life if you seek shortcut."

Technify has a large pool of employees, most of them from Bihar sharing the dream of bringing Bihar at par to other states in terms of education and healthcare. Last but not the least, Technify Foundation is working on Right to Sight, a global initiative for the elimination of avoidable blindness, a joint programme of the World Health Organization (WHO).

Hansraj believes the way out of backwardness starts only when the future generations have access to state-of-the-art healthcare services besides quality education.

www.technify.in

❧ Himalay Verma ❧

(Skill Foods)

Architect-city planner turned rural entrepreneur, Himalay Verma set up SKILL Foods back in 2009 but his keen desire to work in the rural Bihar goes back to his school days. As he studied and grew up in The Doon School, Dehradun, in the late 80s and early 90s, he saw the worst of Bihar and its degeneration.

SKILL Foods is an organization whose objective is to generate employment in rural Bihar. With a farm to plate concept, SKILL Foods started operation with making Tillori and Adori with the domestic helps of Patna.

The company then purchased 35 acres of land in the third most underdeveloped district in the country, Banka, with a view to develop a food park. This food park has two main components, Rural Agri Business Center (RABC) and a food park with food processing unit. The RABC is providing farmer services through its various tie-ups.

Through Mahindra Sammriddhi, SKILL Agri Mall provides seed, pesticides, fertilizers, agricultural pumps and pipes for micro irrigation and a soil testing lab where more than 5,000 farmers get most of their required material and services for agriculture.

Through Tata Agrico, SKILL Foods makes available farming implements and agriculture tools, both mechanised and non-mechanised. A recent addition to the Agri Mall is the globally acclaimed Tirth Agro with their Shaktiman brand of rotary tillers. Through these partnerships, SKILL Foods has regular agri-counselling and agri-clinic at the Agri Mall and also at remote villages.

Alongside the RABC, Skill Foods is working to develop methods of sustainable agriculture and dairy. Its agriculture and dairy operations continue and various tie-ups with GauAnusandhan Kendra, Devlapar, Nagpur, for developing vermin compost, Amrut Paani and other dairy products. Skill Foods has practiced its own form of organic farming with symbiotic relationship of its 50 cows dairy and 35 acres of farming.

In the past 5 years, Himalay has grown paddy, wheat, potatoes, onions, watermelon, eggplant, maize, chillies, tomatoes and gourds from the by-products of the dairy and fed the cows with the produce of the farm.

He always felt for the rural poor and Bihar. Way back in 1992, he wrote his first report on Ratwara, his native village in Bihar. As he completed his course in architecture from IIT Roorkee, he continued with his efforts and started developing a project on rural low cost housing for the Santhal Pargana

region of then undivided Bihar. While visiting this area in one of his journeys that ensued, he saw something that changed his life forever. He saw a lady bathing in a pool. She was wearing half her sari and washing the other half. This flashed back to a time when Mahatma Gandhi witnessed a similar incident somewhere in North Bihar. Bihar did not change. Poverty was so extreme that women did not have adequate clothes to wear, food to eat and houses to live.

After finishing his architecture, he worked with Hafeez Contractor and Talati Pantaky Associates in Mumbai and Architect Nimish Patel in Ahmedabad, the best architects in the country. Yet again, he had this deep urge to do something for Bihar and took a course of Masters in City and Regional Planning at Cornell University, USA with his thesis/ dissertation based on providing employment for rural Bihar through agro-based industries.

During his tenure at Cornell, he met Ratan Tata who gave him the best paying job for an architect in India back in those days. He worked on a multibillion dollar project, Ramanujan IT Park. He, however, quit this lucrative job in 2009; returned back to Patna.

www.skillfoundation.com

❧ **Krishna Kumar** ❧
(Buddha World School)

It was the sheer pain of leaving his home at 17 to attain education that led Krishna Kumar to come back to his village in Vaishali, a district near the state capital Patna and start a school. He was barely 17 in 1994 when he, like every other Bihari boy, was sent to Delhi, away from his home and family for studies.

It was then that Krishna pledged that no other child from his village had to endure the same agony of being deported to remote places for studies; away from family and friends.

There began the genesis of what would be his dream. Sketchy as it was then, Krishna gradually envisaged making a world class educational institution in his native village

providing quality education to local children in the warmth of their respective homes.

Krishna stayed away from his home for 15 years, finished his graduation from University of Delhi in 1998 and completed his post-graduation in History from prestigious Jawaharlal Nehru University to pursue a career in Banking backend services for 10 years with Citibank and HSBC Bank.

This was not all. Krishna planned to return to Vaishali in 2010, his village to give shape to his dream, Buddha World School. A unique residential school based on the ancient Ashram system on a Digital Plane was launched back in April 2016.

This was path breaking, as Vaishali was amongst one of the country's most backward districts. Given the poverty, lack of exposure and learning opportunities and unavailability of proper English medium schools, the standard of education was poor.

There were no avenues available for the holistic development of children, Krishna found. It is this gap that Buddha World School is aiming to fill, by imparting holistic education for the overall development of children. With just the right mix of academic, extracurricular activities and sports keyed in the curriculum.

Not just that! Given the ancient heritage of Vaishali, the school is integrating with the culture of the region so that the campus gels with its surroundings, and at the same time, stands out. Consistent efforts are being made to integrate students and teachers with the surroundings, make them aware of the rich cultural legacy of Vaishali and work towards community development through 'One Good Act a Day'. The ultimate goal is to provide hand holding to the children till they become not just successful professionals but also good human beings.

<http://www.buddhaworldschool.com>

❧ Nikhil Natraj ❧

(Dezine Dezire)

Nikhil Natraj is a heady cocktail of multi-faceted corporate experience of totally different sets of industries ranging from telecommunications to pharmaceuticals to banking to building materials.

Having served in different roles right from customer experience to hardcore sales, to product and revenue data-driven marketing to brand promotion to heading a large business unit on a pan India basis throttled by a team of magnificent minds gave Nikhil a broader outlook of looking at the business.

Growing up in a value rich family, the kid within Nikhil used to revolt to the moral values being imposed on him. He, however, never knew that those values will become his own choice of lifestyle. Not being able to make in to his dream career of armed forces notwithstanding, the training of discipline, leadership and hard leg work in NCC during his college days prepared him to take the challenge of life in a better manner.

Exposer to the outer world, confidence gained under personal guidance of senior army officers gave a different shape to a Gyan Niketan drop out and made him shine with lustre in those days. Becoming University Head Boy by winning prestigious

Chatra Ratna award besides numerous other recognitions during the college days helped making his teens one of the most glorious days of Nikhil's life. He was actually preparing for the major battle called Life!

He started his professional life without wasting a single day and Nikhil was recruited by Reliance Telecommunications as an Outsourced Resource for the newly set up Patna-based call center. He never looked back again.

Tight-knit friendship with the business community helped him making up his mind to shift gears from corporate life to a new entrepreneurial Life. Had a lifetime learning while setting up Bitiya Dairy Farm and then losing it at the hands of poor law and order mechanism in the state.

His first failure in the very first entrepreneurial experience made him emerge stronger. Bitiya Farm made him pure wrought iron. This downfall was quickly followed by his new venture, DezineDezire, with a new energy and, of course, confidence.

He feels that the HAV (Human Asset Value) should always be rated higher than NAV (Net Asset Value) of any person and the process of falling down and then rising up increases the HAV in immense manner.

“Life will be long and everyone has to deal with the frequent ups and downs of life but blessings of God and company of an

effective peer network helped him yield unprecedented results even in bad times,” is what he feels.

Bringing in new concepts and products into designing field for the state market and getting it popularised gives him kick in the dry state of Bihar.

Reviving the ages old royal hand-carved inlay work and zari is one of most prized item amongst others in his basket these days. And the good part is that his search for such unique and out of the box concepts still remains open. Every year at least three exhibitions within country and one abroad is must for him. Like a ritual!

Giving back to the society is something that he learnt from his better half. An active citizen involved in many community service activities like Free Medical Camps, arranging aids for free Heart Surgeries for those marginalized, helping those underprivileged in earning their bread and butter is what he does under his in-house banner of DidiJi Foundation. Giving career counselling to the young kids through Gyan Niketan Alumni & Patna College Alumni networks is a regular activity in his annual calendar. He's presently perfecting a project of creating a platform for Designers of Bihar where Learning comes with Sharing.

<https://www.linkedin.com/in/nikhil-natraj-35bb3b8>

❧ **Niraj Kumar** ❧
(REPL)

Niraj Kumar is a post graduate engineer from Centre of Energy Studies, IIT Delhi and heads REPL, one of the emerging Master System Integrator companies in India recently selected for best 100 SI companies in India by Telecom magazine VAR India in October 2018.

After vast experience of 16 years with Indian Oil Corporation, Toyota and GE, he started a career with Indian Oil R&D center in Fuel research including Hydrogen and Biodiesel. He later shifted to Toyota where continued in Energy Research. He also led Toyota Govt. affairs and CSR department. Worked with GE as Govt. affairs and CSR head and successfully executed the Railway Engine Factory commissioning in Saran district.

He decided to start on his own last year targeting innovative telecom related projects and received orders

from CSC, a Government of India enterprise, for 1,100 high speed Internet hot spots for rural India. His organization is providing Internet services at Prayagraj Kumbh Mela. REPL has established 1,400 high speed Internet hot spots there. REPL works closely with public sector undertakings providing efficient Telecom and IT services.

Some of his key projects include National War Memorial and India Gate (with MTNL), Hotel Ashok (with MTNL), rural WiFi project: 36,000 rural hot spots (with ITI) and internet connectivity project in Andhra Pradesh (Laying of 24,000 km optical fibre with TCIL).

❧ Prashant Kumar Pankaj ❧

(RL Mahto Institute of Education)

Prashant Kumar Pankaj, born at Dalsingh Sarai, Samastipur, comes from a traditional farmer family and his grandfather, Late Nevi Mahto was a freedom fighter whose contribution in Satyagraha Movement is already acclaimed.

His Father Ram Lakhan Mahato, 71, is politician, social reformer, social activist and educationalist. He won his assembly seat in 1995 and rose to the seat of cabinet minister in Government of Bihar back in 1997.

Always a creative professional, Prashant completed his elementary education from Patna and graduated in Electronic and Communications Engineering from BIT Mesra in 2000 after finishing his schooling from a school located in the nondescript corner of Bihar, Dalsingh Sarai.

Right since his student life, he planned to setup his own business rather joining a job in IT or Telecom sector. He

expressed his opinion on his future with his professors and as well as friends. They did not appreciate him much. He then started his own IT company, Heusys Info Technologies Pvt. Ltd in 2000 at New Delhi. Then he never looked back and completed many successful projects.

He is presently heading Dev Bhumi Pvt. Ltd, another feather in his hat, and executed many successful projects in building and construction sectors at Patna, Ranchi, Bhagalpur and many other cities. He also runs two teachers' training College: RL Mahto Institute of Education at Samastipur and another Chandragupta Maurya College of Education at Patna empowering elementary education and offer quality of teaching methodology. He is also aspires to start and event management institute in Patliputra Industrial Area for Spanish and other foreign languages offering global connectivity for Bihar and Biharis. Interestingly, he loves cooking for his family and friends.

Business apart, Prashant Kumar Pankaj has keen interest in many social activities including Women Empowerment, Global Education connectivity and so on. He has attended in many global business summits and Business Entrepreneurship Programme at National and International level.

He has successfully conducted beauty pageant and fashion show in 2018 at Dubai and now leading Bihar 2019 for the same. Currently, he is the Organizing President, Bihar Pravasi Sammelan, bringing a plethora of opportunities for investors, businessmen, scientists and educationalists to sit together and analyse business setup, investment opportunities and innovation possibilities for betterment of Bihar. He has strived hard to bring global connectivity for Bihar and Biharis.

www.rlmie.com; prashantkpankaj@gmail.com

❧ Prem Gupta ❧

(Data Aegis Software Pvt Ltd)

Hailing from the city Begusarai in Bihar, Prem Gupta is an Engineer and entrepreneur by heart and he is the Founder of DataAegis Software Pvt Ltd.

He is an experienced Chief Executive Officer with a demonstrated history of working in the computer software industry and strong business development professional skilled in Management, Payment Cards, Payments, E-payments and Point of Sale (POS) Systems.

❧ Priyanka Singh ❧

(National Institute of Event Management)

Director, National Institute of Event Management, Priyanka Singh is a lady who never planned to educate people but it had to happen. It all started when she was not at all impressed by the quality of services offered to her by the vendors at her marriage. Believe me the event was pompous, but it lacked the impression she was looking for.

She, interestingly, holds a professional post graduate diploma in event management from the prestigious Fergusson College, Pune. She had worked with major brands in multiple cities prior to her marriage. Being daughter of a well-off Jharkhand based business family notwithstanding, her journey with entrepreneurship started like a first generation entrepreneur. She had the

degree and experience. She saw the opportunity. It was time to execute!

That is why she had a close watch on the pattern of services. The lack of commitment on part of local vendors was an apparent business opportunity. Events market being one of the fastest growing segments, she was lucky enough to grab it with both her hands. The sector has witnessed as much as 30 per cent growth recently, she believes.

She started hiring which continued for more than four months. She couldn't find professionals capable enough. Many couldn't even scribble a simple letter; most of them from premium local institutions. Priyanka was dumbstruck. Being a Jharkhand native herself, this was her face off with the locally available human resource.

She then started planning to hire specialised students; even that appeared scarce. It was time when she planned to move on her own. The situation was grim. Brining about a positive change was all she wanted. This is how the doors opened for National Institute of Event Management in Patna.

Articulate, as she is, she believes that the government could've done better if it chose to relax the norms prevalent for newer people. Speaking about the potion to success, she attributed success to original research. She said there are hundreds of registered event management companies in the state and even vendors claimed to be event managers without any specialization.

❧ **Raj Kumar** ❧

(Magnetar Infratech)

Raj Kumar, Chairman, Magnetar Infratech, has been a leader and torchbearer since early childhood. A child of advocate parents, he matriculated from KV Sonpur and completed his Class-XII from Kendriya Vidyalay, Kankarbagh in Patna, Bihar.

During his school days, he was always passionate about debates, skits and speech competitions and has won many regional- and national-level competitions under these categories and represented his school for National Science Exhibition held in Chennai. He was also felicitated with Rajya Puraskar in Bharat Scouts & Guide in Gwalior.

In college, he had been the Convener, Administration and Resource head of GEEKONIX-the official Science

Club of college & EDGE – the annual techno-management fest of Techno India Salt Lake (Second largest in northeast zone of India). He was also the Team Leader of the Anti-Ragging Committee in college & Head of TICL organising Committee (Cricket League).

According to him, real value is about what you believe in, what you're trying to do in the world and also how you make others' lives better. You need to drill down to why you matter. After pursuing BTech from Kolkata, he decided to work for his state and began his journey of entrepreneurship from his homeland, Patna in 2016.

Currently, his organization is working with L&T in NamamiGange Projects & other government projects with annual turnover crossing 10 crore this year. The

NamamiGange Project, once complete, will leave no scope of untreated sewage water from Patna flowing into Ganga, thus making Ganga Cleaner, Better!

MagnetarInfratech is setting up new records everyday such as 498 meter PCC in a single day and night which is record length in L&T, another one of 550 meter in single day and night. MagnetarInfratech is working as top sub-contractor of L&T in NamamiGangeBeur Sewerage Network Project having work done of 10 crore which is highest among all the contractors of Bihar in this Project. They are also working in Danapur Cantonment in Supply Projects (Electrical, Water Supply and Store items).

❧ **Rajeev Mishra** ❧

(Azuri Luxury Furniture)

Hailing from one of the oldest parts of Patna, Rajeev spent his early childhood walking in the narrow lanes of Mehndiganj, Patna City. He has with vast experience of design and execution. He is the Founder of Azuri Luxury Furniture.

It was his growing concern about the limited choice in quality bespoke furniture that he started Azuri back in 2015 with the sole objective of encouraging people and assisting them in furniture design and manufacturing segment providing end-to-end solutions. Azuri targets to catch them young and train the students so that they may develop the aesthetic sense required by the profession.

He is presently operating from Patna and Gurugram. Azuri encourages customers to create their own

customized furniture for their respective houses and executes the design with in-house capabilities.

With the increase in disposable income of the population in general, luxury furniture is gaining acceptance. He is supplying quality furniture across India via an in-house website. His spouse Rashmi Kakkar works for a multinational audit firm and is presently posted in the NCR.

Born first among four kids of Satyendra Mohan Mishra and Usha Mishra, his early schooling was done from Sharda Vikas Mandir, Patna City and then his graduations from Bengaluru. His father is a retired High School teacher and mother, a housewife.

After completing his graduations, he pursued Advanced Diploma in Interior Designing and Implementation. He

never looked for a job! With a skimpy sum of Rs 75 in hand, he negotiated his first assignment. He used to do premium freelance interior designing work that gained him a rich clientele.

Right since his childhood, he was close to nature, there started his passion for building and selling furniture from reclaimed wood. Although the buyers are less than that of regular ones due to the cost; the segment is witnessing an increasing trend.

Having worked for 7 years in furniture design, he once painted the house of an old client. In a separate incident, he fixed the tiles of another client. He is not afraid of getting his hands dirty. He is the one to lead from front and this is recognized by his colleagues.

❧ Rakesh Ranjan ❧ (IBM)

Rakesh Ranjan grew up in a working-class family in the small town of Khagaria, 160 km from Patna in the Northern Indian State of Bihar. Both his parents were teachers — his father was a professor of Physics at Bhagalpur University and his mother taught Home Science at Girls High School. He received a Bachelor of Science degree in Electronics and Communication Engineering at the Institution of Engineers Chennai, then completed an apprenticeship in New Delhi at the prestigious CMC Limited, now part of TCS. Here, he learned the craft of systems and software programming while gaining practical experience working with some of India's greatest institutions, including the National Institute of Immunology, Indian Railways, the India Meteorological Department and the Reserve Bank of India. This hands-on work deepened his interest in solving complex business and technical problem for large enterprises. In 1997,

Rakesh returned to Chennai to take an application programming role at Pentafour.

Around this time, the love of teaching Rakesh had absorbed growing up in a family of teachers prompted him to share his passion for entrepreneurship and technology. He taught technology to working professionals seeking to leverage India's mid-90's IT boom. He also established a software development and training center for Pentafour Software in Calcutta in 1997 before leaving for United States in early 1998.

Rakesh joined IBM — his dream company — in 2000, and immediately began a steady rise through the ranks of management. While working full time in technical leadership positions, Rakesh earned a Master of Science degree in Software Engineering from San Jose State University in California. Shortly after graduating, Rakesh's strongly-held belief in the value of teaching led him to accept an Adjunct Professorship

of Computer Science at SJSU, a position he's held for the past 10 years while also working at IBM.

In 2004 Rakesh led IBM's initiative to build data and analytics services in IBM Cloud, an important strategic move for IBM and for their most significant enterprise clients. While the IT industry was still puzzling over the emergence of artificial intelligence and machine learning, Rakesh was leading important initiatives at IBM to infuse AI and ML into enterprise-grade products that make users more efficient, give clients substantial cost savings, and position them to lead in their markets. To further understand the implementation of AI and ML and the attendant ethical and bias-related challenges, he studied AI and business strategy at the MIT Sloan School of Management. Rakesh credits his parallel careers in industry and academia with placing him at the forefront of AI and ML innovation.

❧ Ramesh Chandra Mishra ❧

(Vidya Vihar Institute of Technology)

Ramesh Chandra Mishra is a distinctive figure in the field of education.

He is the Founder & Chairman of Vidya Vihar Institute of Technology, Purnea.

Established in the 2009, VVIT, is a Degree Level Engineering College approved by various organizations such as All India Council for Technical Education-New Delhi, State Investment Promotion Board-Government of Bihar, Ministry of Science and Technology-Government of Bihar, Ministry of Human Resources Development-Government of Bihar.

VVIT is affiliated to Aryabhata Knowledge University, Patna and have built good infrastructure in a 17 acre Green Campus obtained from Bihar Industrial Area Development Authority. The Labs and Workshops have been equipped with all facilities well beyond the guidelines of AICTE and Universities.

The reputation among students, community, parents and academia within a very short period of time grew grand after the inauguration of first year classes in August 2009, in the presence of Chief Minister Nitish Kumar, Deputy Chief Minister Sushil Kumar Modi, Minister of Industries Bijendra Prasad Yadav and other dignitaries.

Headquarter of the institute is at Purnea, Bihar with above 200 employees working in it.

VVIT, under the guidance of Ramesh Chandra Mishra, is yet another educational venture by a group of enthusiastic professionals primarily the alumni of Netarhat School under the aegis of Vidya Vihar Educational Trust (VVET) in follow-up to their 15 year old Vidya Vihar Residential School project at Parora in Purnea.

It is the humble endeavour to enliven the philosophy of Netarhat School in support of Government of Bihar's initiatives for development of Technical & other institutions of Quality and Excellence.

The promoting body of VVIT is Vidya Vihar Educational Trust. Alumni of Netarhat School, the Gurukul of modern India, are widely acknowledged as great intellectual assets of the country and have created a space of their own around the world.

They are endowed with a large number of distinguished professionals and experts who have made mark both in public and private sectors of the global economy. To contribute to state's prosperity in token of what the people of the state have sacrificed in recognition of their merit has been their grateful concern.

❧ Ravi Rajhans ❧

(Carl Zeiss India)

Ravi Rajhans has his humble roots from the remote town of Khagaria, Bihar. His upbringing made him value education over anything else as his both parents were teachers. His father was a professor of Physics at Bhagalpur University while his mother taught Home Science at Girls High School.

Ravi is a specially trained professional with certificate program in Clinical Trials, Design & Management and certificate program in biotechnology (equivalent to MS) from University of California, Santa Cruz extension and an MBA (distance learning) besides bachelors and masters in Biotechnology with distinction.

Ravi Rajhans has over a decade-long professional experience in the area of clinical research, clinical operations, medical writing, pharma covigilance, regulatory affairs and business development.

Having a great passion to touch the lives of people, he started a LinkedIn Group christened as World Biotechnology Family and is successfully running it with a 12,000 plus members. The primary goal of this group is to bring on one platform all experts of biotechnology and the group has helped to provide new professionals with specialized support from experts.

His desire to benefit new students made him write a chapter on molecular mechanism of nitrogen fixation in rhizobium of a book entitled 'soil microflora' with Dr Rajan Kumar Gupta. His enriching research work in college made him proud applicant of a patent at the Indian Patent office.

That apart, he is socially very active and is presently Founder Trustee of a Bangalore-based cultural trust, conducting social and cultural activities in Bengaluru.

The trust aims to help the underprivileged part of the society.

He is currently working in CARInDept (Center for application and research in India) of Carl Zeiss India (Bangalore) Pvt. Ltd. as clinical affairs professional. His work gives him opportunity to meet with people in the eye care industry.

Moved by the need of the general masses, Ravi has taken the initiative to benefit them with affordable eye care program. Ravi has been an important BEA asset and has proved crucial in spreading awareness about eye care. His initiatives are now pushing affordable eye care to all spread across nondescript corners of Bihar. His biggest strength is his parents, wife and son.

LinkedIn: <https://www.linkedin.com/in/ravirajhans/>

❧ **Sanjay Jha** ❧
(Collateral Medical Pvt Ltd)

Sanjay Jha is Co-Founder of Colmed (Collateral Medical Pvt Ltd). Colmed is a leading platform for medical device distribution in India. He has worked over 20 years in Medical device and technology fields, working in India and US. His experience includes five-year stint in various senior marketing and business development roles at Johnson & Johnson Medical and similar stint in design and development of medical devices with GE Healthcare, USA. He has 3 USA patents to his credit. He is an alumnus of IIT Kharagpur and MBA from INSEAD, France. Sanjay Jha is an experienced entrepreneur with

a demonstrated history of working in the medical device industry, aiming towards bringing the quality of healthcare up and cost of healthcare down. Known for the rare skill of multitasking, his colleagues describe him as a great leader and a wonderful person.

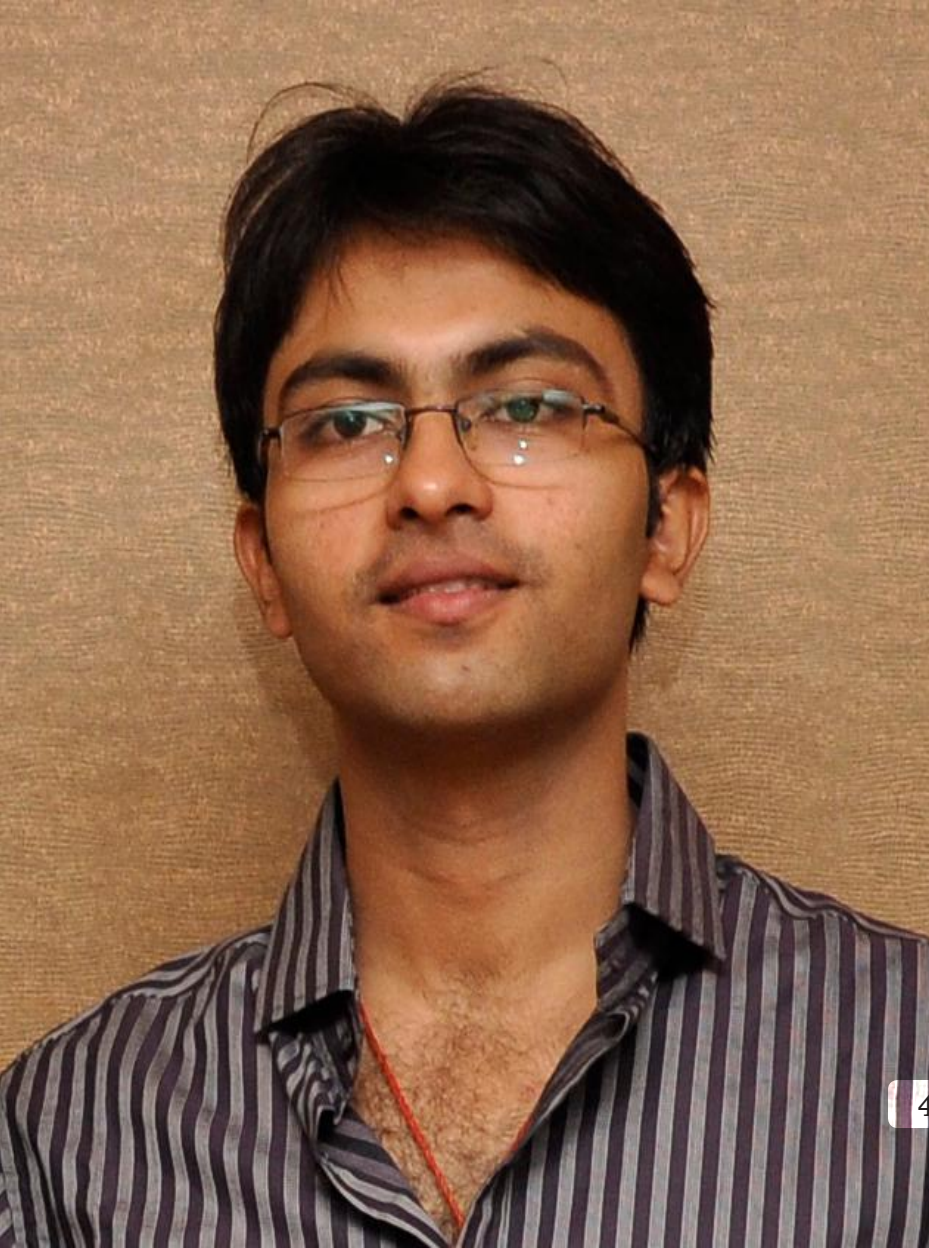

Collateral Medical Pvt Ltd that holds several acclaimed patents including dual energy scanning protocols for motion mitigation and material differentiation, methods, apparatus, and software for adjusting the focal spot of an electron beam, method and apparatus for aligning a fourth generation computed tomography system.

Sanjay is born and brought up in a joint family in Darbhanga, and enjoys being among people.

He did his high schooling from Raj High School, Darbhanga and ISc from CM Science College. He joined IIT Kharagpur in 1992 and since then had only been able to visit Bihar during vacations, but his love for Bihar is still the same. During his IIT days, he used to be heavily involved in sports and during USA days, he had become avid snowboarder.

After completing his graduate course from Indian Institute of Technology, Kharagpur, he joined Ramco Systems as an Analyst Programmer at Chennai. Eventually went to US and like most of the successful Indian entrepreneurs decided to take a flight back home.

<https://www.linkedin.com/in/sanjha>

❧ Shashank Kumar ❧

(DeHaat)

Born in Chapra, Bihar and raised in a lower-middle-class family, Shashank has led his team to many milestones including winning Millennium Alliance, Vodafone Mobile for Good and Action for India-AFI. He has also delivered TED talk at TEDx IIT, Kanpur, in 2012, TiECon Silicon Valley in 2016 and TEDTalk in 2018 at TEDx Patna.

Recognized as an Ashoka Fellow in 2013 as one of the global change maker, Shashank has also been awarded as 'Entrepreneur of the year' in 2013 by Bihar CM in 2014. He was featured as Forbes 30 Under-30 by Forbes-India. He has also been featured among Amazing Indian by Times Now back in 2014.

In past years, he developed a unique model and technology innovation, DeHaat, to offer end-to-end agri services to small and marginal farmers at affordable prices. DeHaat is a one-stop destination for small farmers

for all their agri-needs. It's a technology platform which provides direct access to the last mile service provider for 360 degree agri services - Crop advisory, Crop monitoring, Information, wide range of agri-inputs, equipment and Market linkages of agri-produce. DeHaat is working directly with over 50,000 farmers in Bihar, Odisha, UP. His organization targets over 2.5 lakh happy farmers by March 2020.

Shashank presented DeHaat technology to Rwanda PM in Delhi in 2015 at Indo-Africa technology summit. He accompanied Indian PM and FICCI delegation to Kenya in 2016 to present DeHaat technology. He was invited to Tanzania by Bill & Melinda Gates Foundation to participate for deriving efficient model of agricultural extension in 2015.

His proud father is a retired Grade III government employee in Bihar State Electricity Board and mother, a teacher in a government school. After completing his

schooling from Netarhat Residential School, Jharkhand, he went to IIT Delhi to pursue his undergraduate studies in Textile Engineering and graduated in 2008. He also completed his minor MBA degree from Department of Management Studies, IIT Delhi in 2008.

He is the youngest in his family. His elder brother is a software engineer with Accenture and his sister is a fashion designer. He is married to Mailinie Jauhar, who is his college time sweetheart. She is presently AVP with a consulting firm.

Shashank had earlier worked for a management consulting firm in supply chain, retail and FMCG sectors after completing his BTech from IIT Delhi back in 2008.

https://en.wikipedia.org/wiki/Shashank_Kumar

❧ Dr Satyajit Kumar Singh ❧

(Ruban Memorial Hospital)

Dr Satyajit Kumar Singh, MS, FRCS, Diploma from Institute of Urology (London) is the Consultant Urologist/Andrologist at Ruban Memorial Hospital, Patna. Born in 1950 and resident at KadamKuan in Patna, has long experience and expertise as a Doctor.

He completed his MBBS & MS from Patna University, FRCS from Royal College of surgery, Glasgow and Diploma in Urology from London University, UK. He has worked as Lecturer, Senior Registrar & Senior Consultant Urologist in India and abroad, such as Monkland Hospital–Scotland, North Middles Hospital–London, Institute of Urology–London, George Elhol Hospital –Nuneaton, King Fahael Hospital–Saudi Arabia and as Managing Director at Ruban Memorial Hospital, Patna.

He started his career as a Rotating Intern in 1974 at Patna Medical College Hospital and went on to become House Officer, General Surgery and then Civil Assistant

Surgeon at Bihar Health Services. Thereafter, he headed towards London to complete his Diploma in Urology after which there was no looking back. From 1985 to 1995, he was in London, Belfast, Middlesex, Nuneaton and Saudi Arabia for his higher education and practice as Clinical Assistant (Honorary), Lecturer, Locum Consultant Urologist, Consultant Urologist and Senior Urologist.

Once questioned by a senior Supreme Court attorney on his decision to come back to Patna, Dr Singh attributed this to nothing but his affection to the city. Dr Singh, who has presented many international papers on the impact of uranium usage on villages nearby, believes he enjoys a lot here with a pool of 950 employees, of which 112 are doctors. It was his keen desire to return home that took him to war-torn Middle East during the Gulf War. Saudi paid him well. But India was still missing! Saudi people assisted him in his intent of shifting back to India.

He is a great social figure who has done a lot for the society in the most modest way without bragging and

letting everyone know about it. He has been a part of relief work during flood caused by Punpun River in 1964. He collected and distributed food materials and clothes among victims of drought in Central Bihar in 1967. He served victims of Indo-Pak War at the border areas of Bangladesh in 1971; organized different health and operation camps. He is also the President of Indian Peoples' Theatre Association, Patna, Bihar and Senior Vice President (Indian Doctors for Peace and development), India alternate of International Physician for Prevention of Nuclear War (APPNW) which is a Nobel Peace Prize winner organization. He also serves as Secretary, Swami Sahajan and Sarswati Ashram involved with upliftment of rural mass and Peace & Harmonic society.

Not only in India but also during his stay in abroad, he collected and distributed funds for victims of Latur and Bhopal tragedy as a member of Indo-Scotties societies in England.

<http://www.rubanpatliputrahospital.com>

❧ Vishwa Mohan ❧

(AIRDIT software services Pvt Ltd)

Vishwa Mohan Kumar, CEO, AIRDIT Software, currently based in Bangalore with his wife Shweta and beautiful daughter Shaivi, hails from a remote village Pareji in Siwan, Bihar. He was brought up in the middle-class family and had four siblings.

He was the youngest son of his parents, Late Saryu Prasad Pandey and Smt Maya Pandey. His father was an English professor and also a patient of Parkinson disease which is till date an incurable disease and mother, a housewife. He had a tough life in his childhood; he had seen his family surrounded with problems due to his father's illness, legal challenges, father's job at risk, neighbour's threat, illegal encroachment on their house, and many more.

It was his mother who took charge and control of everything and acted as their guiding star. There was a time when he used to roam the entire market for buying cheap groceries and go from one end of

Patna to another on foot every day for coaching classes, there was not enough money to avail even rickshaw. Although, he was an average student but always dreamt of excelling in life; completed his schooling from Sadar Alam Memorial School, Biharsharif and Bachelor of Engineering from VTU, Belgaum.

Initially, he never thought of making a career choice as he had to find a job somehow to justify his studies. A friend of his eldest brother assisted him in getting one in the IT sector. However, after joining his first job at SAP Labs in Bangalore, he got seriously involved in his work.

He was in Malaysia for two years working at Shell as a consultant and came back to India and got an

opportunity to work with a company in a key position where he was responsible for running their new division.

After gaining expertise and knowledge, he started his own venture, AIRDIT Software Services Pvt Ltd with Soumya Ranjan Mohapatra, a technocrat from Orissa and also the CTO of AIRDIT. The organization's head office is in Bangalore with focus on ERP products and services.

The current trend is that organizations are spending huge on their business software, AIRDIT software is all set to offer various connectors and add-ons at a very reasonable cost to organizations across the globe. These products should address needs of Indian and International customers. Being a Bihari, he is most enthusiastic in recruiting the Bihari youth.

<http://airditsoftware.com/>

❧ Vivek Vishal ❧

(Qmax Kids)

He started Chain of Modern playschool by name Q Max and has spread to Delhi-NCR.

His latest methodologies to inculcate Values, Good Habits, Nature's Analysis, Reasoning has made its venture a unique place for kids to grow their mind and thought process. A curriculum has been designed keeping in all aspect of growth of a Human Mind. He personally sees every faculty and trainers at the Q Max centres and regular upgraded training is provided to them which converts into innovative methodologies of making a Kid learn, enjoy and grow.

Qmax Kids Educational Institute is the place where an all-round development of children is the goal of education, for the overall development of human beings, alone bookish knowledge is not enough to make ordinary person capable of all struggles in life, other qualities of the child needs to be refined and polished and also inculcated so that they become capable to facing all odds in life.

Education does not just mean only reading or excelling in examination, education is an overall development

through which human beings stand on their feet in life.

When a child is 16 years, he or she gets exposed to the outer world after education, it is the practical world that people face making them aware that their survival depends on their fighting and survival skills and capability to fight challenges. These things can only be done by over development of the child in their school days.
